

To get started
you will need...

- Construct A Sticks 301648
- Kids PVA Glue 085746
- Liquicryl Paint Set 286997
- Kindergarten Scissors 147553
- Jumbo Triangular HB Pencil 124404

step-by-step

- Cut off the round ends of 4 Construct a Sticks. Using Kids PVA Glue to glue the 4 Construct A Sticks together vertically, to form a long, hollow, rectangular box. This will form the centre of your tree. The flat bottoms at the end will assist the tree to stand.
- Lay out 9 Construct A Sticks on your work area and line them up so that they form steps. The bottom one the longest, then the next one a bit shorter, the next one shorter than the last. Continue until you get to the ninth Construct A Stick.
- Draw a line from the end of the bottom Construct A Stick along up to the top Construct A Stick. Cut along the line just drawn
- Using Kids PVA Glue, glue the Construct A Stick pieces, flat side, onto one side of the rectangle box.
- Repeat steps the last two steps for the rest of the 27 Construct A Sticks and glue them onto the other 3 sides of the rectangle box.
- Now you have formed your tree you might like to paint it green with Liquicryl Paints.

if you like this
craftactivity
you might like the
fairy decoration.
